

YouCam Muse

v3.0

Product Feature Specification

Complete specification: 22 feature areas with callout annotations, UI behaviour rules, and edge cases.

July 2026

Perfect Corp · CONFIDENTIAL

VERSION	DATE	AUTHOR	SUMMARY OF CHANGES
v3.0	July 6, 2026	Darren Liu	Added Community Profiles, Proof of Creation, Overlays.
v2.0	June 26, 2026	Darren Liu	Added Create Mode, Edit Storyboard, Community Feed.
v1.0	June 15, 2026	Darren Liu	Covers F01–F18: App Launcher, Home, AI MV flow, AI Song flow, History, Community, Account, Onboarding, IAP.

Note: Update version number and add a row for every revision distributed to stakeholders.

Splash & Onboarding

Onboarding

MVP

OVERVIEW

Users first encounter the Splash screen (app logo + loading state) then a brief Onboarding carousel explaining the two core creation modes. A Skip link lets returning users bypass onboarding entirely.

CALLOUT ANNOTATIONS

- 1 App Logo — YouCam Muse crown-and-note logo centred on dark background. Animates in on launch.
- 2 Loading Spinner — Indeterminate ring below logo while app initialises (auth check + CDN prefetch).
- 3 Onboarding Visual — Full-bleed AI-generated illustration representing the creation mode.
- 4 Headline — Two-line benefit statement; changes per onboarding page (MV / Song / Community).
- 5 Get Started CTA — Primary button on final page; routes to Explore Home. Auth not required.
- 6 Skip Link — Top-right 'Skip' text button. Visible on all pages. Routes directly to Explore Home.

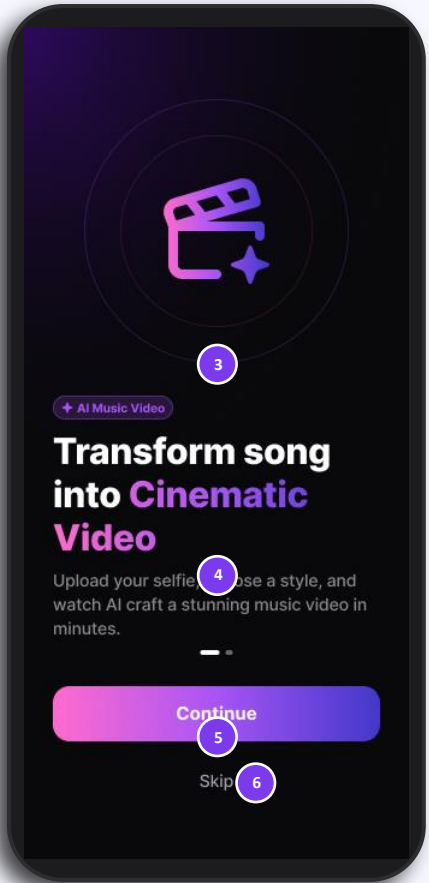

BEHAVIOUR & RULES

Shown when	First-launch only. Re-shown after account deletion + re-install.
Skip	Skipping saves a flag; onboarding is never shown again on same device.
Back nav	Swipe-back returns to previous onboarding page. First page: no back gesture.
Edge case	Offline on first launch: splash hangs with retry banner after 10s timeout.

USER FLOW · SPLASH → ONBOARDING → EXPLORE HOME

① Splash

② Onboarding

Explore Home

OVERVIEW

Explore is the app's main discovery feed. It surfaces a Hero MV Banner, quick-create mode chips, New MVs grid, Top Picks Songs rail, and a New Songs list — all community-generated content.

CALLOUT ANNOTATIONS

- 1

Hero Banner

Promoted MV with title, creator, and 'Create MV' CTA chip. Auto-plays muted.
- 2

Feature Entries

Music Video · AI Song — primary entry points, always visible below banner.
- 3

New MVs Section

Horizontally scrollable grid of community MVs. 'See All' navigates to full list.
- 4

Top Picks Songs

AI-generated songs recommended by editorial. Play-preview on tap.
- 5

New Songs List

Chronological feed of freshly created songs with Like and Create MV actions.
- 6

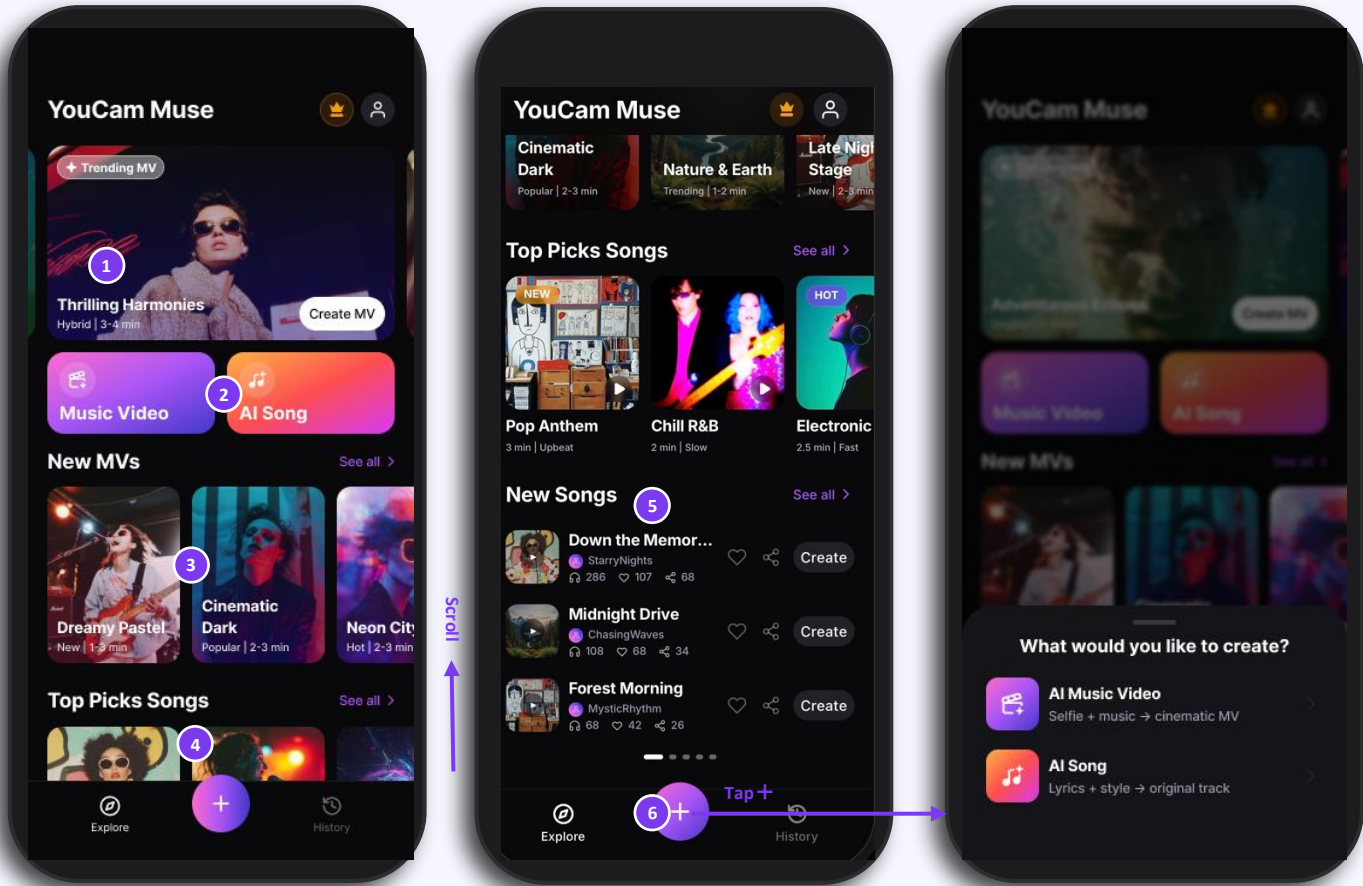

Create Sheet

Create short cut to open entry for AI MV and AI Song

BEHAVIOUR & RULES

Refresh	Pull-to-refresh. Infinite scroll on New Songs section.
Tab bar	Bottom: Explore (active) · + Create FAB · History.
Account icon	Top-right crown/avatar icon opens Account profile sheet.
Credits badge	Gold coin badge in top-right shows current credit balance.
Empty state	If no community content yet, show editorial placeholder cards.

USER FLOW · HOME → CREATE

② Create Sheet

AI MV — Feature Room

OVERVIEW

The AI MV Feature Room is the primary creation configuration screen. Users select an MV Type (Singing / Storytelling / Hybrid), choose a song, describe their video idea, upload character photos, and configure output settings before generating.

CALLOUT ANNOTATIONS

- 1

MV Type Selector

Horizontal scroll: Singing · Storytelling · Hybrid. Purple border on selected. Preview thumbnail above label.
- 2

Choose a Song

Song Library or Import Audio. Required field — CTA disabled until song selected.
- 3

Video Idea Field

2500-char text area. Templates chip inserts pre-written prompts. Idea chip generates AI suggestion.
- 3.1

AI Prompt Optimization

When prompt is filled, an AI optimized button will appear to proofread user's input prompt.
- 4

Character Photos

Up to 2 face photos (optional). Sample photos carousel below upload slots.
- 5

Settings Row

Ratio: 9:16 · Resolution: 720P · Title · Author · Subtitle · Watermark toggles. Expandable.
- 6

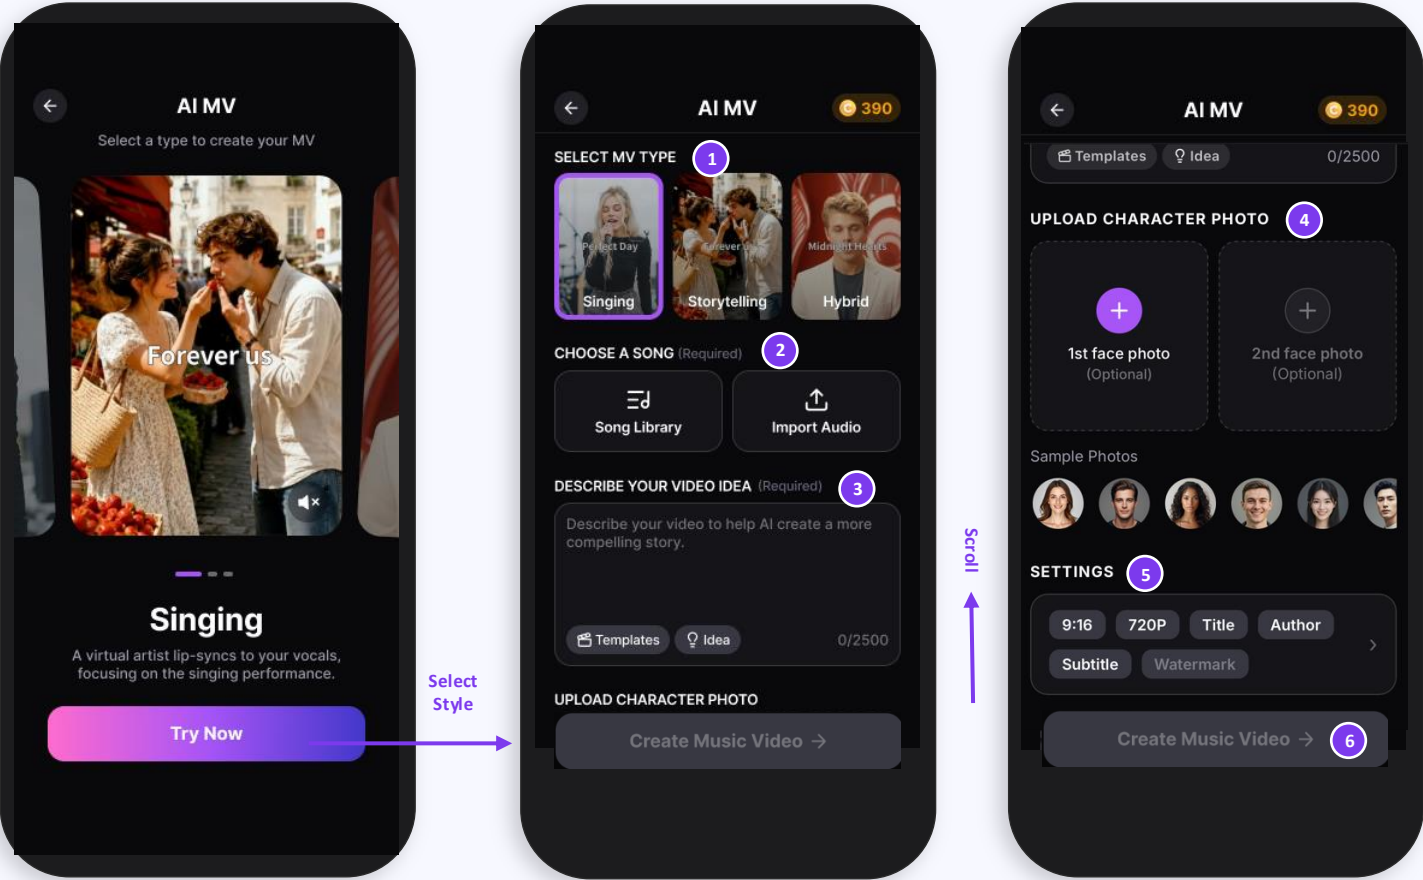

Create MV CTA

Full-width gradient button. Disabled when required fields empty.

BEHAVIOUR & RULES

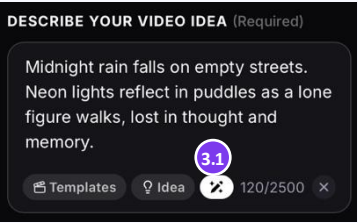

MV Type default	Singing selected on entry. Persists user's last choice.
Song required	CTA is disabled until a song is chosen.
Remaining Credits	After logged in, user's remaining credit would show in upper right.
Settings persist	Last-used ratio and resolution settings are remembered per session.
Edge case	No credits: CTA leads to IAP sheet instead of generation.

USER FLOW · AI MV → CONFIG

① Style Picker

② Feature Room

AI MV — Output Settings

OVERVIEW

Tapping the Settings row at the bottom of the AI MV Feature Room opens a bottom sheet with six output controls: Aspect Ratio, Resolution, MV Title, Author Name, Show Subtitle, and Show Watermark. Settings persist across sessions.

CALLOUT ANNOTATIONS

- 1

Settings Row

Collapsed chip row in Feature Room: 9:16 · 720P · Title · Author · Subtitle · Watermark. Tap anywhere to open sheet.
- 2

Aspect Ratio

9:16 Portrait (default) or 16:9 Landscape. Selection changes the preview thumbnail ratio on the Feature Room.
- 3

Resolution

720p (default, free plan) or 1080p (Pro subscribers only). 1080p chip shown as greyed-out with crown badge on free plan.
- 4

MV Title

Optional text field. Value appears as a title card overlay in the rendered video. Max 60 chars.
- 5

Author Name

Optional text field. Appears alongside title card in video. Pre-filled from Account profile name if available.
- 6

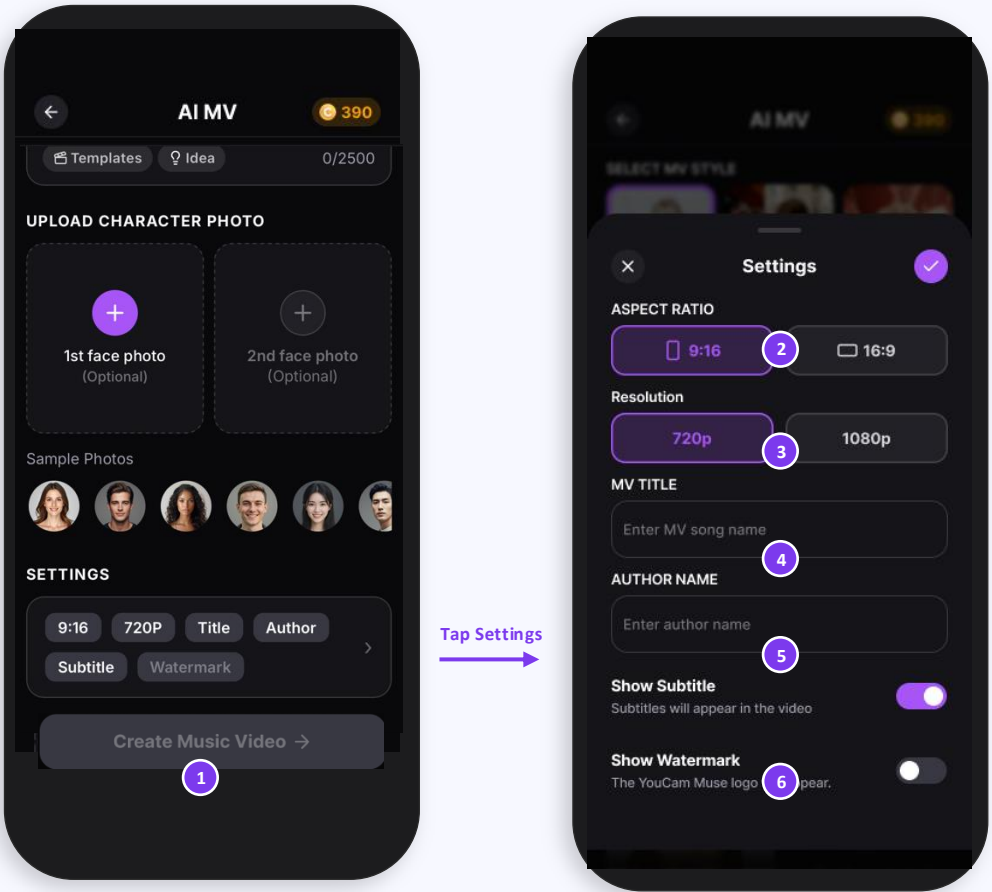

Subtitle / Watermark

Show Subtitle: ON by default — burns styled subtitles into video. Show Watermark: OFF by default — toggles YouCam Muse logo in corner.

BEHAVIOUR & RULES

Trigger	Tap anywhere on the collapsed Settings chip row in the AI MV Feature Room.
Persist	All settings persist across app sessions. Reset to defaults via Settings > App Preferences.
1080p gate	1080p requires active Muse Pro subscription. Tapping on free plan routes to IAP subscribe sheet.
Confirm	Purple ✓ button top-right confirms and collapses sheet. × or drag down dismisses without saving.
Watermark	Pro subscribers can disable watermark permanently. Free plan can toggle but watermark re-enables on next session.
Edge case	If MV Title is empty, no title card is rendered. If Author is empty, author line is hidden in the title card.

USER FLOW · FEATURE ROOM → SETTINGS SHEET

① Settings Row (collapsed)

② Settings Sheet

AI MV — Choose Song

OVERVIEW

The Choose Song sheet is a bottom sheet modal that lets users pick a song for their MV. It has two tabs: My Songs (user-created) and Sample Songs (editorial). A song preview plays inline on tap.

CALLOUT ANNOTATIONS

- 1

Tab Switcher

My Songs · Sample Songs — pill tabs. My Songs shows user's AI-generated library.
- 2

Song Row

Thumbnail · Title · Duration. Tap to preview (inline player). 'Use' button confirms selection.
- 3

Playing State

Purple text + pause icon on active preview row. Audio fades on sheet dismiss.
- 4

Empty State

My Songs empty: 'You haven't created any songs yet' with Create Song shortcut.
- 5

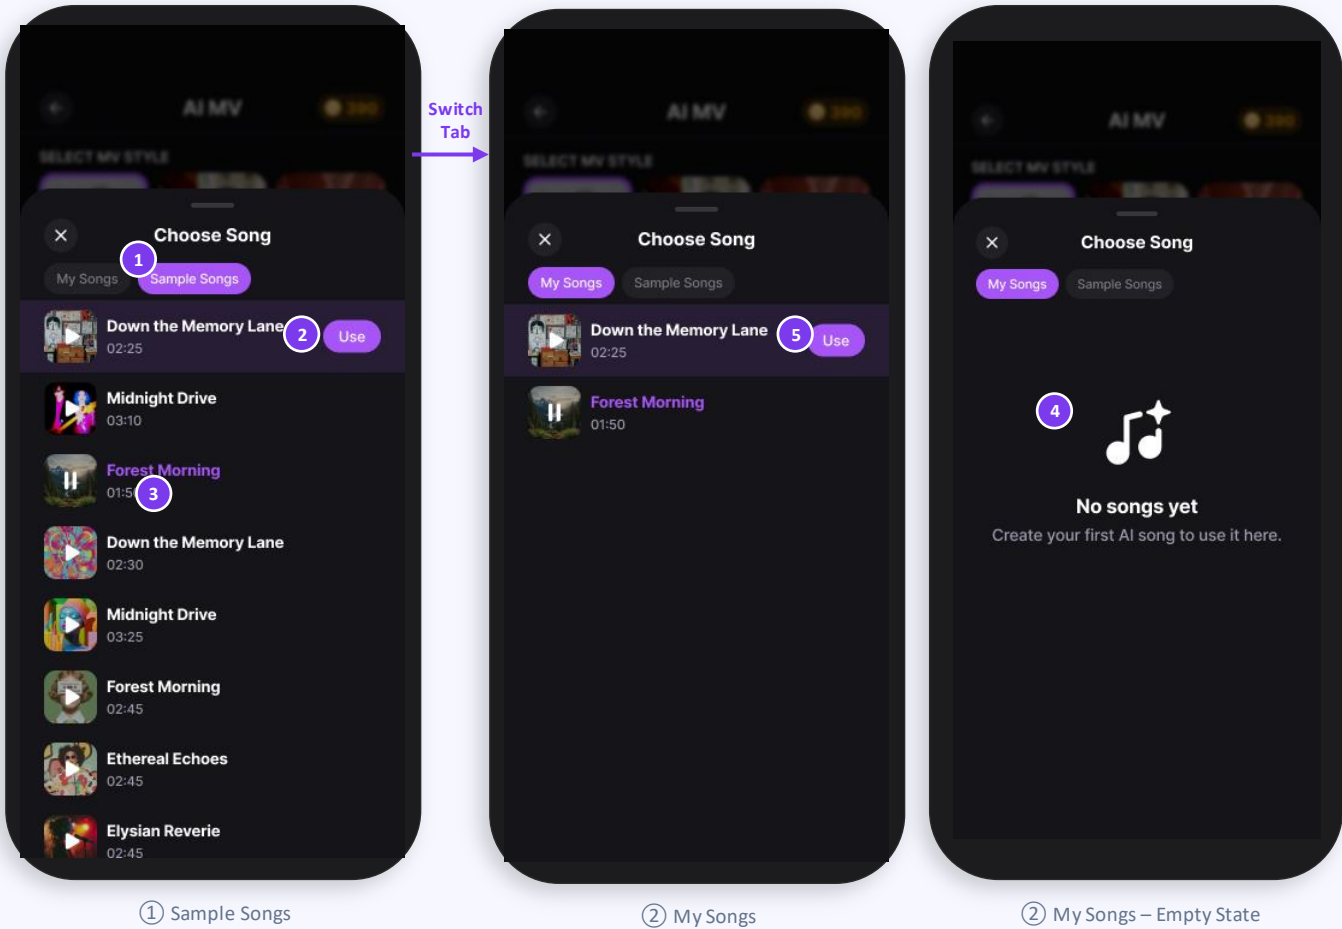

Use Button

Appears on selected row. Tapping confirms and returns to Feature Room.

BEHAVIOUR & RULES

Trigger	Tapping 'Song Library' in AI MV Feature Room.
Preview	Tap any row to begin preview. Only one preview active at a time.
Import Audio	Separate entry point ('Import Audio') outside this sheet — opens system media picker.
Dismiss	Drag down or tap x. Returns to Feature Room without selection if no 'Use' tapped.
Edge case	My Songs and Sample Songs list is paginated; loads 20 per fetch.

USER FLOW · FEATURE ROOM → SONG SELECTION

AI MV — Trim Audio

OVERVIEW

Trim Audio is a mandatory step shown when user select from song library or import audio file. Minimum length of audio is 30 secs.

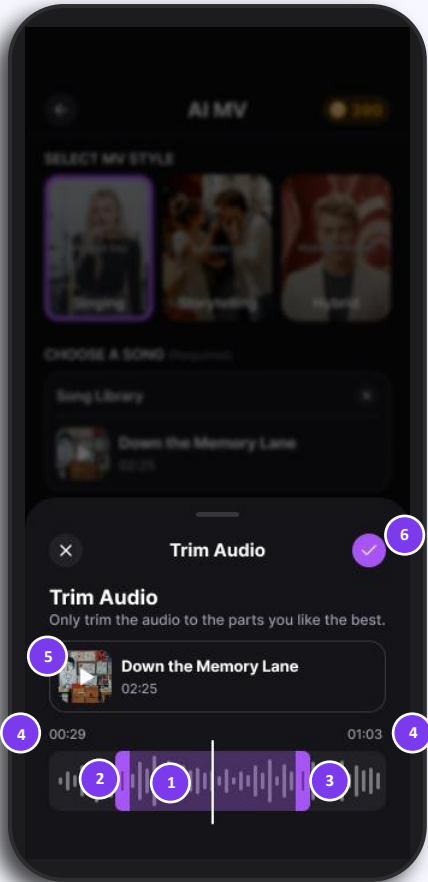

CALLOUT ANNOTATIONS

- 1 Waveform Timeline — Scrollable waveform. The selected region is highlighted in purple. Unselected regions are dimmed.
- 2 Left Handle — Drag to set the start point. A time label appears above the handle while dragging.
- 3 Right Handle — Drag to set the end point. Minimum clip length matches MV duration (cannot trim shorter).
- 4 Duration Counter — Live readout Start and End timestamp.
- 5 Playback Button — Plays the selected region inline. Pauses on second tap.
- 6 Confirm CTA — 'Use This Clip' — enabled only when selection ≥ required duration. Returns to Feature Room.

BEHAVIOUR & RULES

Trigger	Shown after 'Import Audio' when the file duration exceeds the MV's required audio length.
Minimum length	Selection must be ≥ 30seconds. Handle cannot be dragged past this minimum.
Audio formats	Supports MP3, AAC, WAV, M4A. Max import size 50 MB.
Playback	Plays the selected clip only, not the full file. Volume follows system level.

USER FLOW · SINGLE SCREEN

1 Trim Audio

Create Mode Selection

OVERVIEW

After confirming song and style, a 'How would you like to create?' bottom sheet lets users choose between AI Story Mode (AI writes the storyboard automatically from the prompt) and Custom Mode (user writes each scene's synopsis manually before generation).

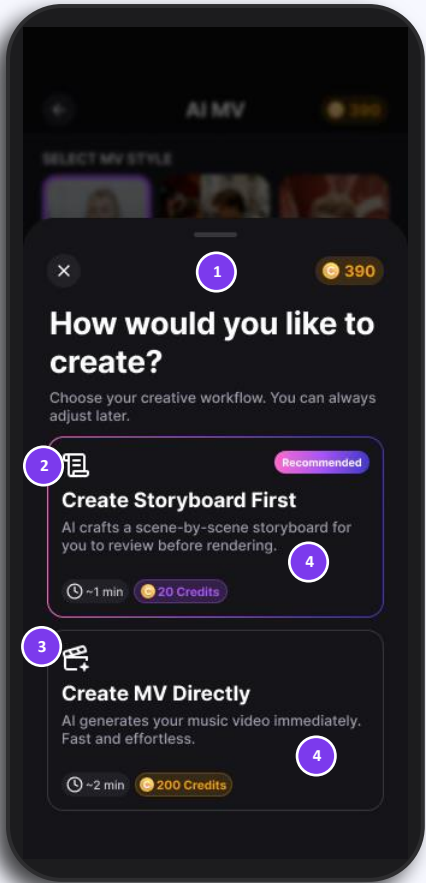

CALLOUT ANNOTATIONS

- 1 Sheet Handle — Drag handle. Swipe down or tap backdrop to dismiss; returns to Feature Room.
- 2 Create Storyboard First— Recommended path. User fills in each scene synopsis manually in Edit Storyboard. More control.
- 3 Create MV Directly — AI generates storyboard from prompt + character automatically. No editing required.
- 4 Mode Description — Short explanation under each card.

BEHAVIOUR & RULES

Credits	Cost shown under CTA: '🎬 200 per MV'. Credits deducted when generation starts.
Dismiss	Dismissing sheet cancels the flow; returns to Feature Room with all selections intact.
Edge case	Insufficient credits: CTA shows 'Buy Credits'; routes to IAP Buy Credits tab.

USER FLOW · SINGLE SCREEN

1 Mode Selection

Storyboard Generation & Processing

OVERVIEW

Storyboard Processing: AI writes all scene synopses.

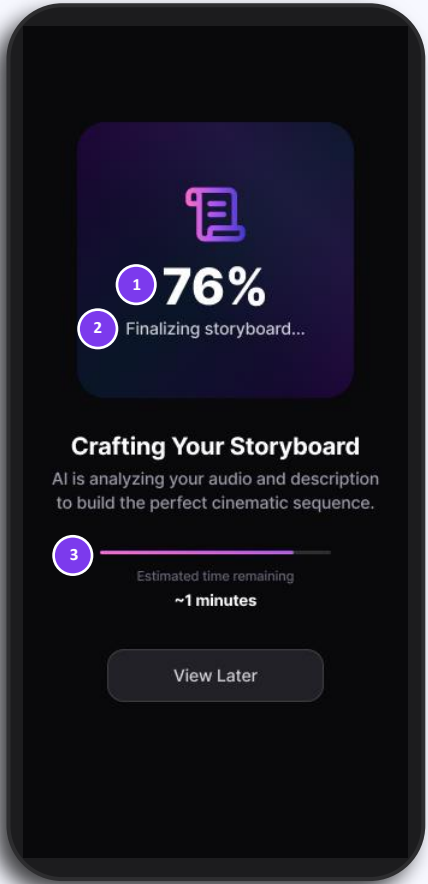

CALLOUT ANNOTATIONS

- 1
- Processing Status — Show % completion.
- 2
- Step Label — Current step text: 'Analyzing audio ...', 'Detecting rhythm & mood...', 'Generating scene concepts...', 'Composing visual narrative...', 'Finalizing storyboard...'.
- 3
- Progress Bar — Determinate purple gradient bar. Updates after each scene.
- 4
- View Later — User can view storyboard later in My Creations page > All or Music Videos tab.

BEHAVIOUR & RULES

Background	User can minimise app; generation continues server-side. Push notification on completion.
Error handling	On failure: “Failed” task show in My Creation page with task marked “Failed”. Credits refunded automatically.
Edge case	Network drop mid-generation: continues server-side; result appears in History on reconnect.

USER FLOW › STORYBOARD PHASE → MV RENDER PHASE

Storyboard Processing

Edit Storyboard

Creation

Updated

OVERVIEW

Edit Storyboard. User can preview song, update visual style prompt, preview story, update Story Line scenes.

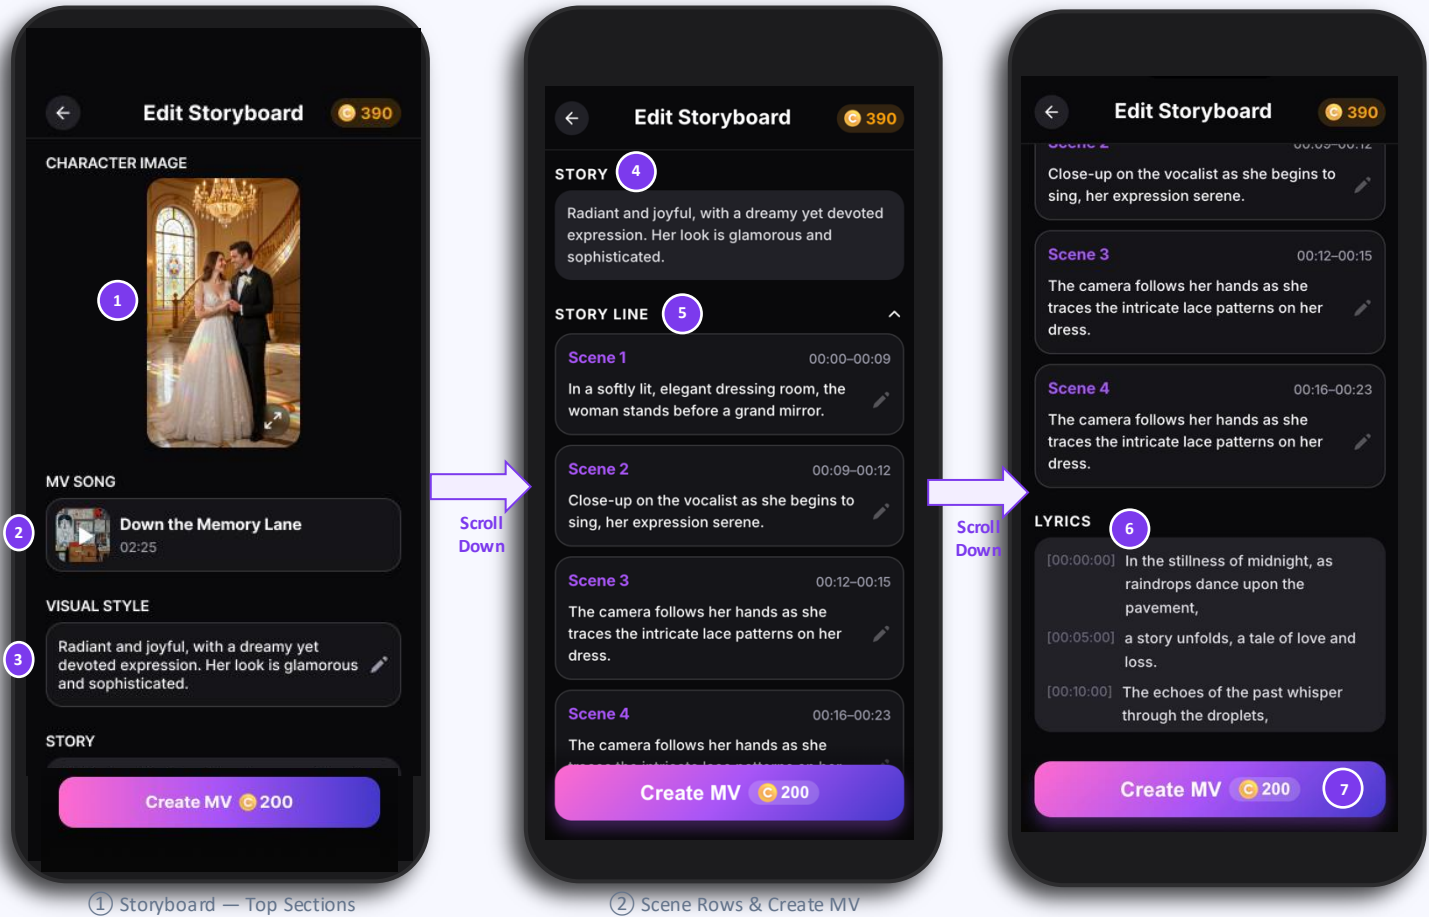

CALLOUT ANNOTATIONS

- 1 CHARACTER IMAGE — AI-generated character image. Tap ↗ for fullscreen viewer. User can download image in preview mode.
- 2 MV SONG Row — Tappable: ▶ icon on left to preview song in-screen. User can't change song in this page.
- 3 VISUAL STYLE — Current style description. Tap pencil icon → Edit Visual Style sheet with AI Prompt Enhancer tool.
- 4 STORY — Non-editable MV story description.
- 5 STORY LINE Scene Rows — Scenes with expand/collapse chevron (▾). Expand shows synopsis textarea + scene thumbnail. On tap pencil icon to bring up Scene edit panel with AI Prompt Enhancer tool.
- 6 LYRICS — Show timestamp and lyrics. Read-only.
- 7 Create MV CTA — Shows required credit to generate MV.

BEHAVIOUR & RULES

Story section	Gray-bg read-only block: AI-generated story from Character + Style + Story Line. Read only.
Lyrics section	Read-only AI-generated lyrics with timecodes aligned to selected song.
Edge case	Empty scene textarea: row highlighted in red; Create MV CRA is disabled.

USER FLOW · TOP SECTIONS → SCENE ROWS

MV Generation & Processing

OVERVIEW

After confirmed storyboard, click Create MV to start processing MV generation: renders video scene by scene, showing a live progress rail with step labels and scene thumbnails appearing as they complete.

CALLOUT ANNOTATIONS

- 1
- Processing Status — Show % completion.
- 2
- Step Label — Current step text: ‘Generating your scenes...’, ‘Syncing visuals to the beat...’, Rendering your music video...’, ‘Applying final touches...’etc.
- 3
- Progress Bar — Determinate purple gradient bar. Updates after each scene completes.
- 4
- View Later — User can view storyboard later in My Creations page > All or Music Videos tab.

BEHAVIOUR & RULES

Background	User can minimise app; generation continues server-side. Push notification on completion.
Error handling	On failure: “Failed” task show in My Creation page with task marked “Failed”. Credits refunded automatically.
Edge case	Network drop mid-generation: continues server-side; result appears in History on reconnect.

USER FLOW · STORYBOARD PHASE → MV RENDER PHASE

MV Rendering

MV Result

OVERVIEW

The MV Result screen presents the generated video in full-screen portrait mode with overlay controls. A vertical social share rail on the right allows direct sharing to Instagram, TikTok, WhatsApp, and X. Bottom actions cover Download, Edit MV, and Recreate.

CALLOUT ANNOTATIONS

- 1 Social Share Rail — Right-edge icons: Instagram, TikTok, WhatsApp, X, More. Tap to share directly with video link.
- 2 Like / Dislike — Tap to save to Liked collection in History. Icon fills white when liked or disliked.
- 3 Sound Toggle — Mute / unmute the video audio. State persists across navigation.
- 4 Play / Pause — Tap anywhere on video to toggle. Scrubber appears briefly at bottom on tap.
- 5 Edit MV — Opens Edit MV screen (F09) to adjust cover, description, scenes, and title.
- 6 Download — Saves to Camera Roll.

BEHAVIOUR & RULES

Auto-play	Video auto-plays on arrival with audio on (respects silent switch on iOS).
Recreate	Bottom-right 'Recreate' redirect to AI MV feature room with same prompt, material and settings prefilled.
Publish	On tap publish, a confirmation dialog asking user to confirm to publish MV creation to community. Once published, a toast would show.
Back nav	Back arrow routes to Explore Home (not back to processing screen).

Edit MV

Creation

Updated

OVERVIEW

Edit MV allows post-generation refinement. A Cover Description section with regeneration CTA. User can edit each scene and merge edited version to MV. Cover Image is 9:16 ratio with fullscreen tap. A Delete This Project button is added at the bottom.

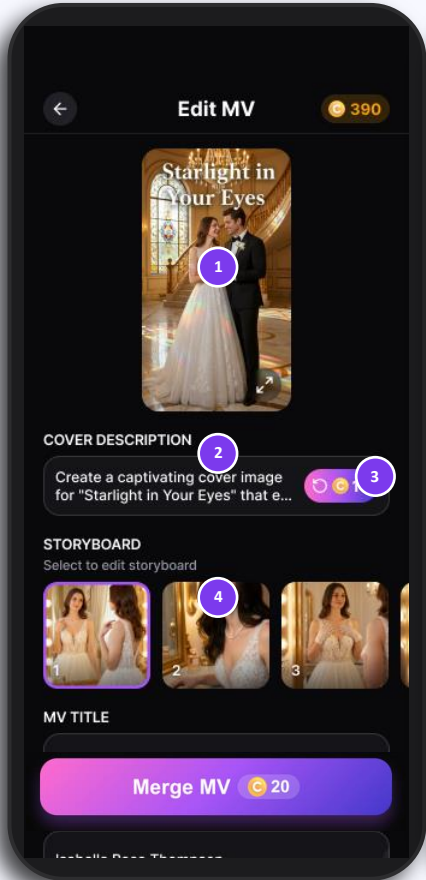

CALLOUT ANNOTATIONS

- 1
- Cover Image — 9:16 AI-generated thumbnail. Tap → fullscreen viewer. Image is downloadable. Tap close or Pull-down to dismiss.
- 2
- Cover Description — Text area for cover image generation prompt. Pre-filled by AI from song and style context.
- 3
- Cover Regeneration — CTA to regenerate cover image.
- 4
- Storyboard Row — Scene thumbnails. Tap scene to enter scene view and edit panel. User can edit scene description and recreate scene.
- 5
- MV Title & Author — Title card text fields for the video opening. Author defaults to account name.
- 6
- Delete This Project — Red destructive button at bottom. Removes MV and storyboard. Credits not refunded.

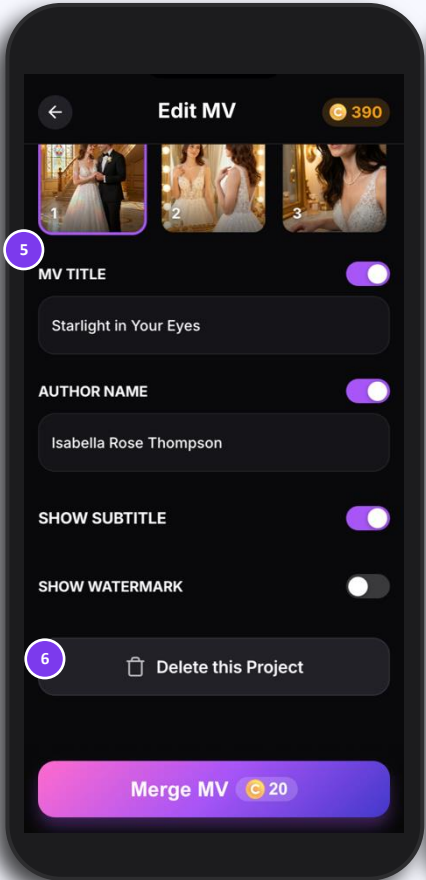

BEHAVIOUR & RULES

Re-render cost	Single scene re-render: TBD. Full MV re-render: TBD
Cover persist	Title, Author, and Cover Description auto-save; no explicit save button.
Delete confirm	Red confirm dialog: 'Delete Project' — tap 'Delete' to confirm. Irreversible.

MV Video Player

Discovery

Social

OVERVIEW

The MV Video Player is the community viewing experience for Music Videos. Supports two aspect ratios: 9:16 portrait (default) and 3:4 portrait. Overlay controls include creator info, social actions, a progress scrubber, and a persistent 'Create Music Video' CTA at the bottom.

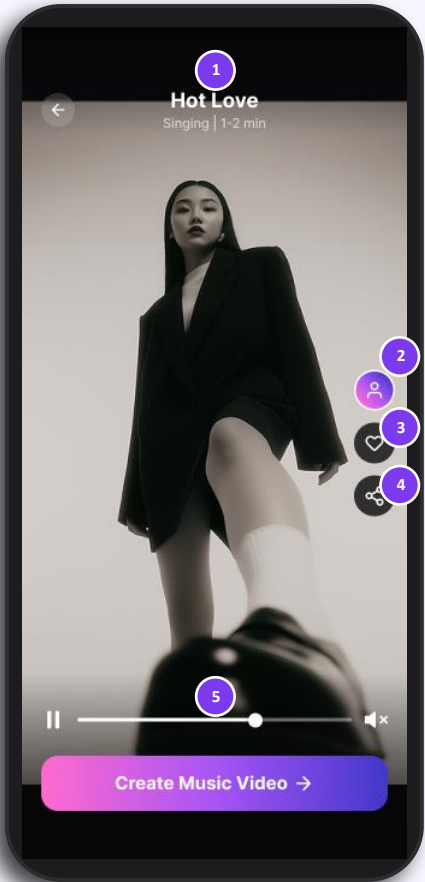

CALLOUT ANNOTATIONS

- 1 Title & Genre — Song title + genre/mood tag at top-left. Tap title → Song Player (F13).
- 2 Creator Avatar — Creator's avatar with username. Tap → Community User Profile (F17).
- 3 Like / Heart —Tap to like. Liked state: heart fills white.
- 4 Share —Opens native share sheet with video link.
- 5 Scrubber — Progress bar at bottom of video. Sound toggle at right edge of player.
- 6 Create MV CTA — Sticky banner at bottom: 'Create Music Video →'. Routes to Feature Room (F03).

BEHAVIOUR & RULES

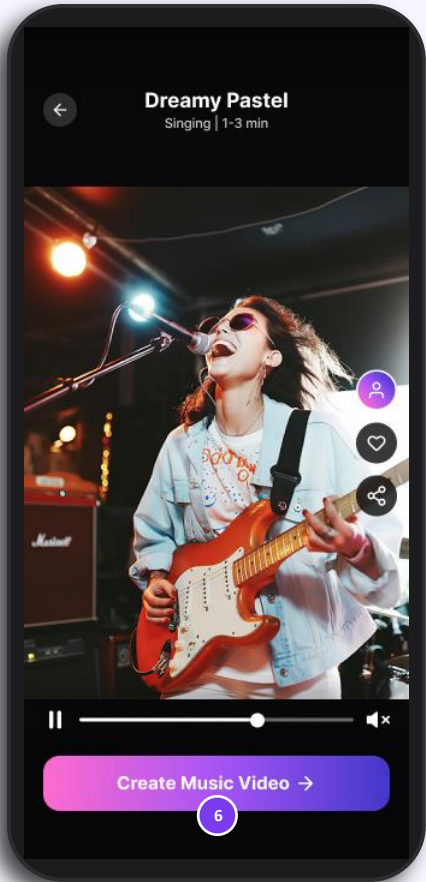

Aspect ratio	9:16 is default. Tap  to switch to 3:4 view.
Community feed	In community context: swipe up to navigate to next MV.
Controls fade	Overlay fades after 3s of no touch. Tap video to reveal controls again.
Own MV	Creator viewing own MV: 'Edit MV' replaces 'Create Music Video' CTA.
Edge case	MV still processing in History: result screen shows loading state until first segment ready.

USER FLOW · 9:16 VIEW → 3:4 VIEW

② 3:4 Portrait

AI Song Feature Room

Creation

Updated

OVERVIEW

The AI Song Feature Room has two creation modes: Simple (describe song in one field) and Custom (genre, mood, vocal, lyrics). Prompt Enhance Tool and an Instrumental toggle visible in both modes.

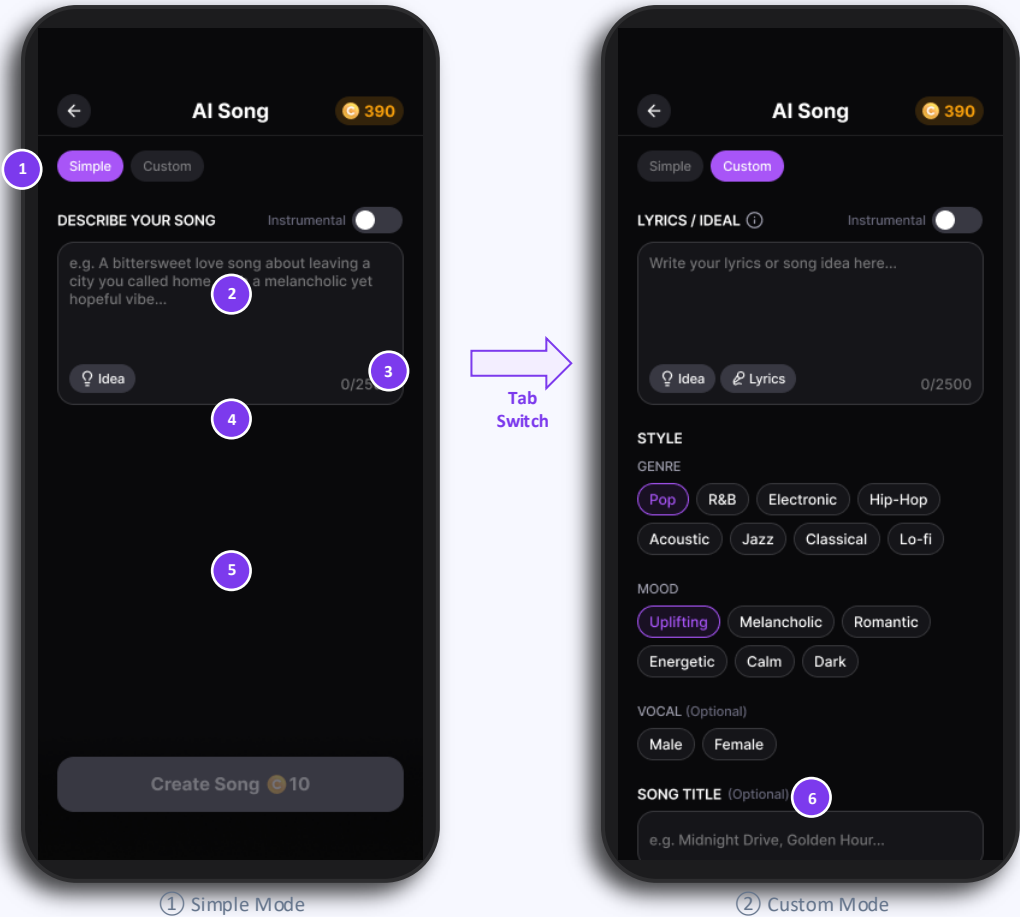

CALLOUT ANNOTATIONS

- 1 Simple / Custom Tabs — Tab bar at top. Simple is default and recommended path for new users.
- 2 Describe Field — Multi-line textarea. Placeholder: 'Warm acoustic song for a summer road trip...'
- 3 Prompt Enhance — ✨ button at bottom-right of describe field. AI rewrites for optimal song output.
- 4 Idea Chips — Scrollable suggestions ('Dreamy', 'Energetic', 'Romantic'). Tap to append to field.
- 5 Instrumental Toggle — Toggle to exclude vocals. When ON: 'Instrumental Only' — no lyrics generated.
- 6 Create Song CTA — Full-width purple button. Shows credit cost ₪ 50. Tap → Song Processing screen.

BEHAVIOUR & RULES

Custom mode	Shows Genre picker, BPM slider, Key selector, and per-line Lyrics text area.
Lyrics tab	Third tab in Custom mode. User writes each lyric line; AI fills timing and melody.
Instrumental	When ON: Lyrics tab is disabled. Song generated with melody but no vocal track.
Enhance cost	First enhance per session free. Additional: ₪ 1 each.
Edge case	Describe field empty: CTA disabled with tooltip 'Tell us about your song first'.

USER FLOW · SIMPLE MODE → CUSTOM MODE

Song Result & Lyrics Sheet

Creation

New

OVERVIEW

Song Result is the post-generation screen for AI-created songs, featuring circular album art, playback controls, and two CTAs. The new v3.0 Lyrics Sheet is a swipe-up bottom sheet with full synched lyrics — the active line is highlighted white during playback.

CALLOUT ANNOTATIONS

- 1 Album Art — Circular AI-generated cover art. Reflects song mood and genre palette.
- 2 Title & Genre — AI-named song title + genre/mood tags ('R&B · Warm') below album art.
- 3 Like & Share — Heart (save to Liked) + Share icons. Like saves to History Liked tab.
- 4 Playback Controls — Previous / Play-Pause / Next + progress scrubber. 30s preview for free users.
- 5 Use in Music Video — CTA routes to AI MV Feature Room (F03) with this song pre-loaded in the song slot.
- 6 Lyrics Sheet — Swipe-up bottom sheet. Full synched lyrics; active line shown in white. Mini player + pause inline.

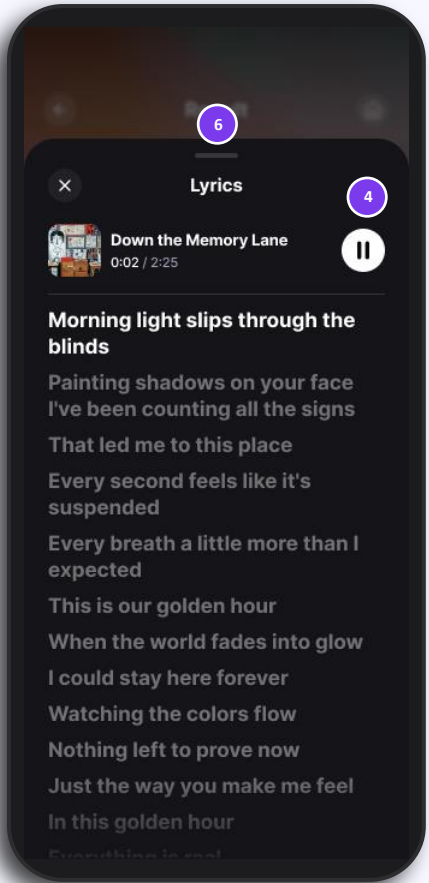

BEHAVIOUR & RULES

Free preview	Free plan: 30s preview only. Full playback unlocked with Pro subscription.
Recreate	Re-generates song with same prompt. Costs 50. Previous song saved in History.
Lyrics trigger	Tap 'Lyrics' chip or swipe up on result screen to reveal the Lyrics Sheet.
Sync accuracy	Lyric sync uses generation timing data. Instrumental mode: no lyrics shown.
Edge case	No internet: playback from cache if previously loaded; Lyrics Sheet needs connectivity.

USER FLOW · SONG RESULT → LYRICS SHEET

1 Song Result

2 Lyrics Sheet

Song Player

Discovery

Social

OVERVIEW

The Song Player offers a full-screen audio playback experience with circular album art, a synced scrubber, and social actions. v3.0 renames the bottom CTA to 'Create AI Song'. In community context, tapping the album art reveals the creator's profile link.

CALLOUT ANNOTATIONS

- 1
- Album Art — Large circular cover art with gentle rotation animation during playback.
- 2
- Title & Genre — Song name + AI-assigned genre/mood tags below art.
- 3
- Social Actions — Like (heart) + Share icons. Like saves to History Liked tab; Share opens native sheet.
- 4
- Progress Scrubber — Seek bar with elapsed/remaining time. Drag to skip. Free: first 30s only.
- 5
- Playback Controls — Shuffle · Previous · Play/Pause · Next · Repeat controls.
- 6
- Create AI Song — Bottom CTA (renamed from 'Create My Song'). Routes to AI Song Feature Room (F11).

BEHAVIOUR & RULES

Community mode	From community/explore: Next/Previous navigate community song feed.
Own song mode	From History: Next/Previous navigate the user's own song library.
Seek gating	Free plan: seek restricted to first 30s. Scrubber shows lock icon beyond 30s.
Offline	Cached songs play offline. Non-cached: loading indicator; CTA grayed out.
Edge case	Song still generating: player shows 'Processing...' state; playback unavailable.

USER FLOW · SINGLE SCREEN

1 Song Player

Community Feed — See All

OVERVIEW

Two 'See All' screens expand home section previews. New MVs uses a 2-column masonry layout with portrait cards. Top Picks Songs uses a vertical list with album art and ▶ play. v3.0 adds 20% dark overlay + type indicator icons on all thumbnails.

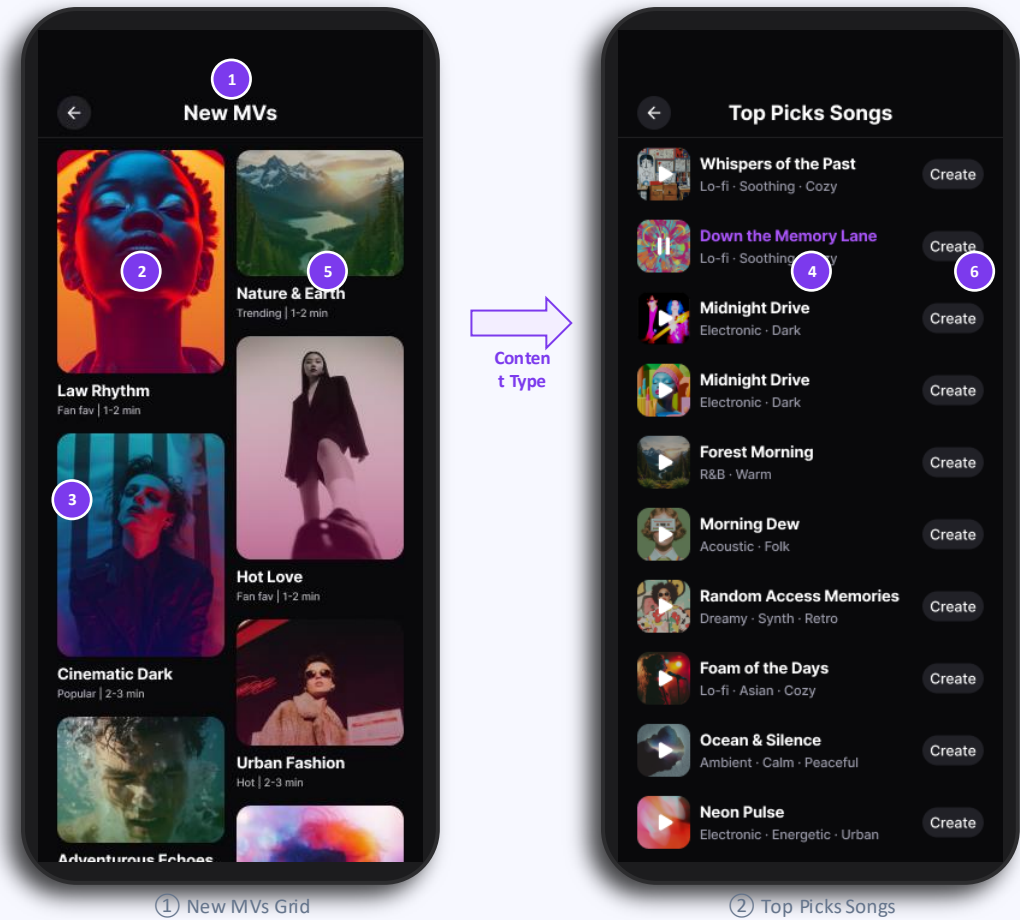

CALLOUT ANNOTATIONS

- 1 Section Header — 'New MVs' / 'Top Picks Songs' title + Back arrow (no search in v3.0).
- 2 MV Card — Portrait thumbnail with 20% black overlay + play icon centred. Creator name bottom-left.
- 3 Type Icon — Video camera (MV) or music note (Song) icon at thumbnail bottom-left (new v3.0).
- 4 Song Row — Album art · Song title · Genre tag · Duration. Tap → Song Player (F13).
- 5 Social Counts — Like and play counts shown on each card/row.
- 6 Creator Avatar — Small avatar on MV card bottom-right. Tap → Community User Profile (F17).

BEHAVIOUR & RULES

Pagination	Both feeds load 20 items per page. Infinite scroll triggers new fetch at 80% scroll.
Tap MV card	Tap → MV Video Player (F10) in community swipe-up feed mode.
Tap song row	Tap → Song Player (F13) in community playlist mode.
Filtering	No filter in v3.0. Content ranked by recency + engagement score.
Edge case	No content: empty state with 'Be the first to create!' illustration and CTA.

USER FLOW · NEW MVs GRID → TOP PICKS SONGS

History

OVERVIEW

History (now labelled 'My Creations') is a unified list of the user's MVs, songs, and storyboards. v3.0 adds type icon overlays on thumbnails, a 'Create' pill on Done Storyboard rows, a Liked tab, and updates the option menu with 'Edit MV' + 'Get Proof' as prominent top CTAs.

CALLOUT ANNOTATIONS

- 1 Tabs — All · Music Videos · Songs · Liked. Liked tab shows community-liked content (new v3.0).
- 2 Content Row — Thumbnail + type icon overlay (🎬/🎵) · Title · Status badge · Date · ⋮ menu.
- 3 Status Badges — Generating (spinner) · Done (green) · Failed (red) · Storyboard (purple) states.
- 4 Create Pill — On Storyboard-Done rows: 'Create' pill at right. Tap → re-enters MV creation with this storyboard.
- 5 Edit MV / Get Proof — v3.0 option menu top row: two large CTAs. Edit MV → Edit MV (F09); Get Proof → Proof of Creation (F21).
- 6 ⋮ Menu — Additional actions below top CTAs: Like · Share · Publish toggle · Download · Delete.

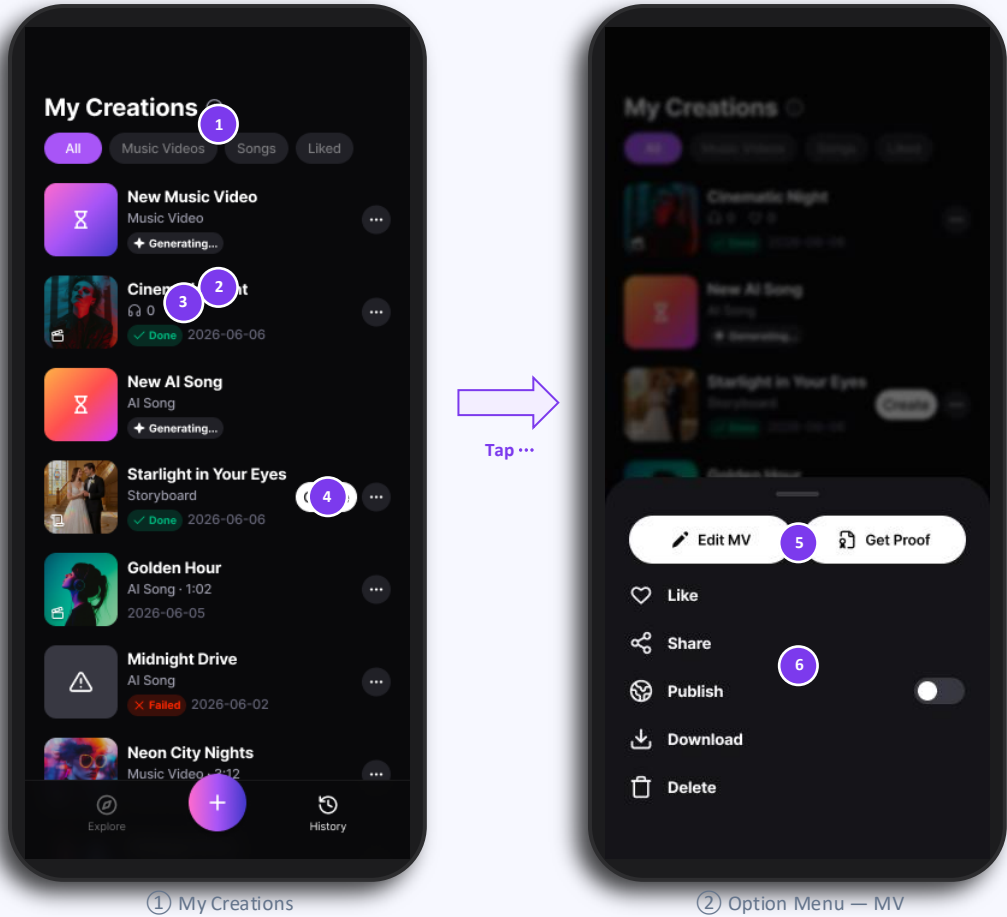

BEHAVIOUR & RULES

Delete	Requires confirm dialog. Removes from History and server. Credits not refunded.
Storyboard	'Storyboard' status: storyboard done but MV not yet generated. 'Create' pill appears.
Liked tab	Community content the user has liked. Unlike removes from this tab.
Sort order	Latest first within status groups. Generating items always at top of All tab.
Edge case	Guest / non-logged-in: full sign-in prompt with Explore Browse fallback.

Navigation

Updated

USER FLOW · MY CREATIONS → OPTION MENU

My Community Profile

OVERVIEW

My Community Profile shows the user's public creator identity with avatar, name, stats, and a tabbed grid of published MVs and Songs. v3.0 updates: type icon overlays on thumbnails, tappable content rows open MV Result / Song Player, and tapping Stats navigates to a filtered community feed.

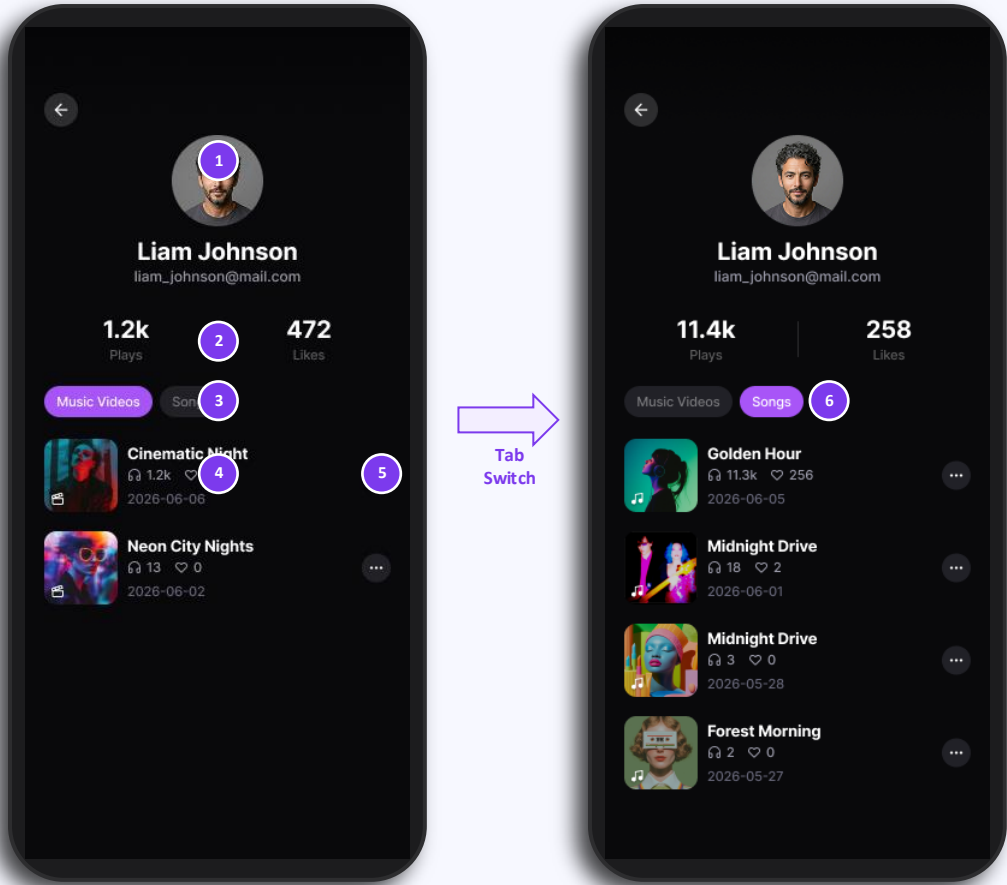

CALLOUT ANNOTATIONS

- 1 Avatar — Circular avatar. Tap → Edit Profile Sheet (update name, bio, or photo).
- 2 Name & Stats — Display name + 'Plays · Likes'. Tap stat counts → filtered community feed.
- 3 MVs / Songs Tabs — Tab selector. Music Videos shown by default; count in tab label.
- 4 Content Row — Thumbnail with 20% overlay + type icon. Tap → MV Result / Song Player.
- 5 Row Options — ⋮ icon per row. Actions: Like · Share · Delete. Delete shows confirm dialog.
- 6 Songs Tab — Published songs list. Same tappable behaviour → Song Player in personal mode.

BEHAVIOUR & RULES

Entry	From Account screen 'Community' section, or History Liked tab creator link.
Private items	Unpublished MVs/Songs do not appear on Community Profile.
Stats refresh	Plays + Likes refresh each time screen is entered; pulled from server in real-time.
Tap row	Opens content in full player (MV Video Player or Song Player).
Edge case	No published content: empty state with 'Share your first creation' CTA.

USER FLOW · MVs TAB → SONGS TAB

① My Profile — MVs Tab

② My Profile — Songs Tab

Community User Profile

OVERVIEW

Community User Profile is the read-only view of another creator's profile, reached by tapping creator names or avatars throughout the app. v3.0 updates: content rows are now tappable to open the creator's MV / Song, and row options include Like, Share, and Report.

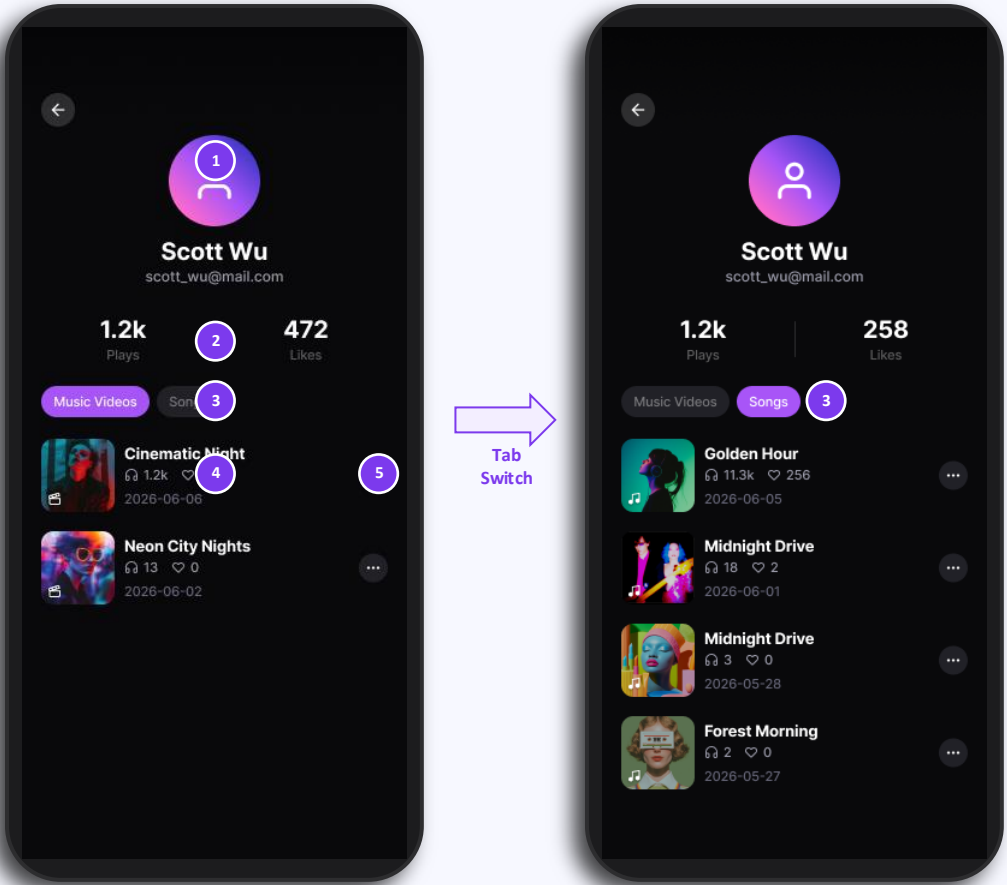

CALLOUT ANNOTATIONS

- 1 Creator Header — Back arrow · Avatar · Display name · More options (...) top-right: Report/Block.
- 2 Stats Row — Plays · Likes. Read-only in this view; no feed navigation on tap.
- 3 MVs / Songs Tabs — Same tab pattern as own profile. Counts shown in labels.
- 4 Content Row — Thumbnail + type icon. Tap → MV Video Player / Song Player (view-only mode).
- 5 Row Actions — ... per row: Like · Share · Report. No Edit or Delete (not content owner).

BEHAVIOUR & RULES

Blocked user	Blocked profile shows 'This account is unavailable'.
Report	Routes to in-app content moderation form. Confirmed via success toast.
Own profile	Viewing your own profile from a community link redirects to My Community Profile (F16).
Song player	Opening a song: community playlist mode (Next/Prev = this creator's other songs).
Edge case	No published content: empty-state tabs with 'No creations yet' text.

USER FLOW · MVs TAB → SONGS TAB

① User Profile — MVs Tab

② User Profile — Songs Tab

Account

Account

Updated

OVERVIEW

The Account screen is the personal hub for profile, credits, and subscription management. v3.0 changes: tapping MVs or Songs stats now routes to My Community Profile (not History). A new Settings row above Sign Out routes to the new Settings screen (F19).

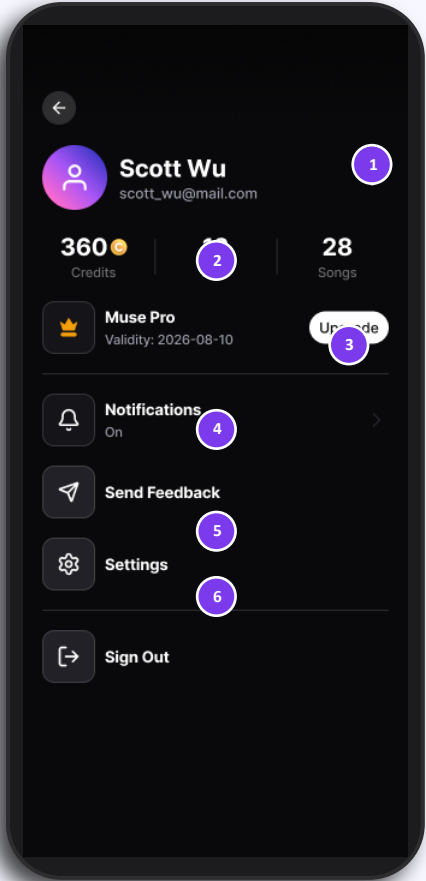

CALLOUT ANNOTATIONS

- 1 Edit Pencil — Pencil icon in avatar area. Tap → Edit Profile Sheet (name, bio, avatar photo).
- 2 Stats Row — 'Credits · MVs · Songs'. Tapping MVs or Songs → My Community Profile (v3.0 change).
- 3 Muse Pro Row — Shows current plan status. 'Upgrade' button → IAP Subscribe Plan (F20).
- 4 Notifications — Push notification toggle. When OFF: no creation-complete or like alerts.
- 5 Send Feedback — Opens in-app feedback form (WebView). Device/OS/version metadata auto-appended.
- 6 Settings Row — NEW in v3.0. Routes to Settings screen (F19) for legal links and account management.

BEHAVIOUR & RULES

Stats tap v3.0	Credits tap → Credits Detail. MVs/Songs tap → My Community Profile (was History in v2.0).
Settings	Settings row replaces Sign Out at bottom of list; Sign Out is now inside Settings (F19).
Pro badge	Muse Pro crown badge shown next to display name when active subscription detected.
Credits detail	Tapping credit balance → Credits Detail screen (balance + spend history).
Edge case	Guest mode: limited fields shown; sign-in prompt at top of Account screen.

USER FLOW · SINGLE SCREEN

1 Account

Settings

Account

New

OVERVIEW

Settings is a new screen in v3.0 reached via Account → Settings row. It consolidates legal links, subscription management, and account deletion. Delete Account triggers a destructive confirmation dialog. Sign Out is relocated here from the Account root.

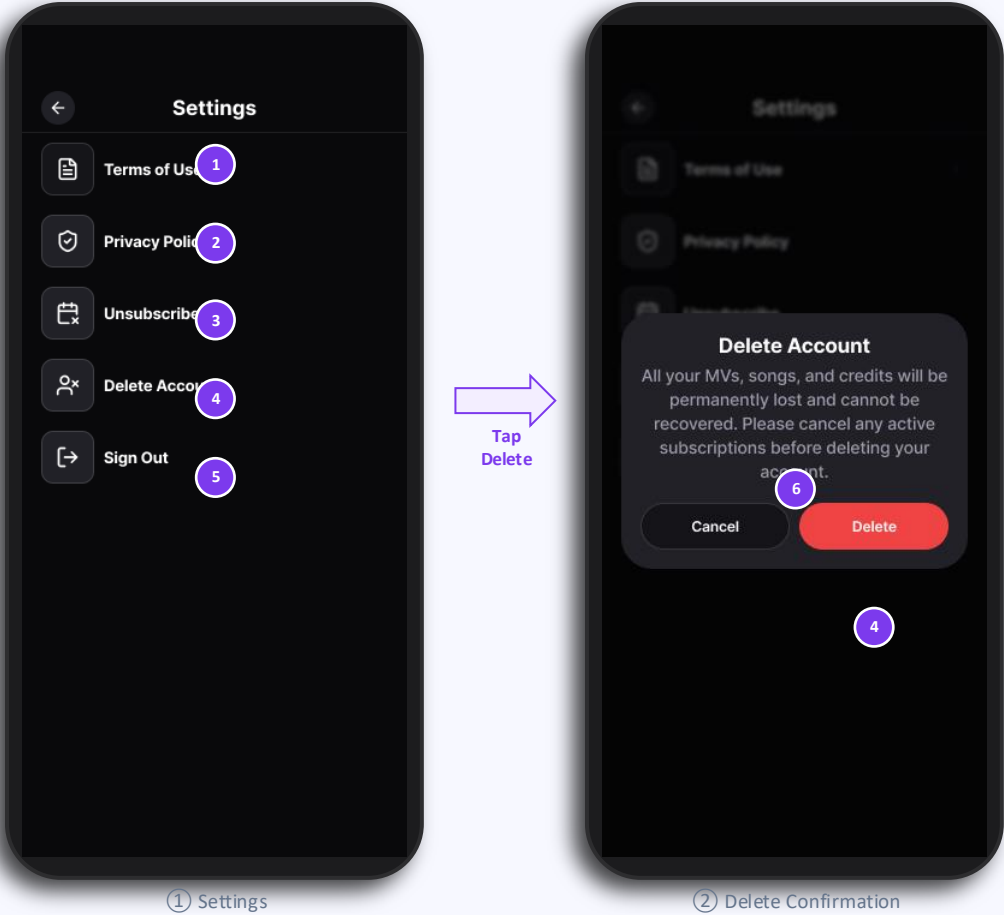

CALLOUT ANNOTATIONS

- 1 Terms of Use — Opens Terms of Use in an in-app WebView. URL is localised per region.
- 2 Privacy Policy — Opens Privacy Policy in an in-app WebView.
- 3 Unsubscribe — Cancels Muse Pro. Deeplinks to App Store / Play Store subscription management page.
- 4 Delete Account — Destructive. Tap → confirmation dialog: 'All data permanently removed.'
- 5 Sign Out — Clears session token. App returns to Explore Home in guest mode. Data preserved on server.
- 6 Delete Dialog — 'Cancel' and red 'Delete' buttons. Irreversible — also cancels any active subscription.

BEHAVIOUR & RULES

Unsubscribe	Does not delete account. Data and credits preserved. Downgrade to free at next billing cycle.
Delete Account	Permanently deletes all data: History, Community content, credits. Cannot be undone.
Sign Out	Session cleared; account and server data preserved. User can sign in again.
Back nav	Back arrow returns to Account screen.
Edge case	Delete while Pro active: dialog warns 'Your subscription will also be cancelled immediately.'

USER FLOW · SETTINGS → DELETE CONFIRM

IAP — Subscribe & Buy Credits

Monetization

OVERVIEW

Two monetization screens: Subscribe Plan (Muse Pro) and Buy Credits. v3.0 redesigns Subscribe Plan with Weekly / Monthly / Yearly pill selectors, an '800 Weekly Credits' header, and a feature list. Buy Credits adds a 'POPULAR' badge on the 300-credit pack.

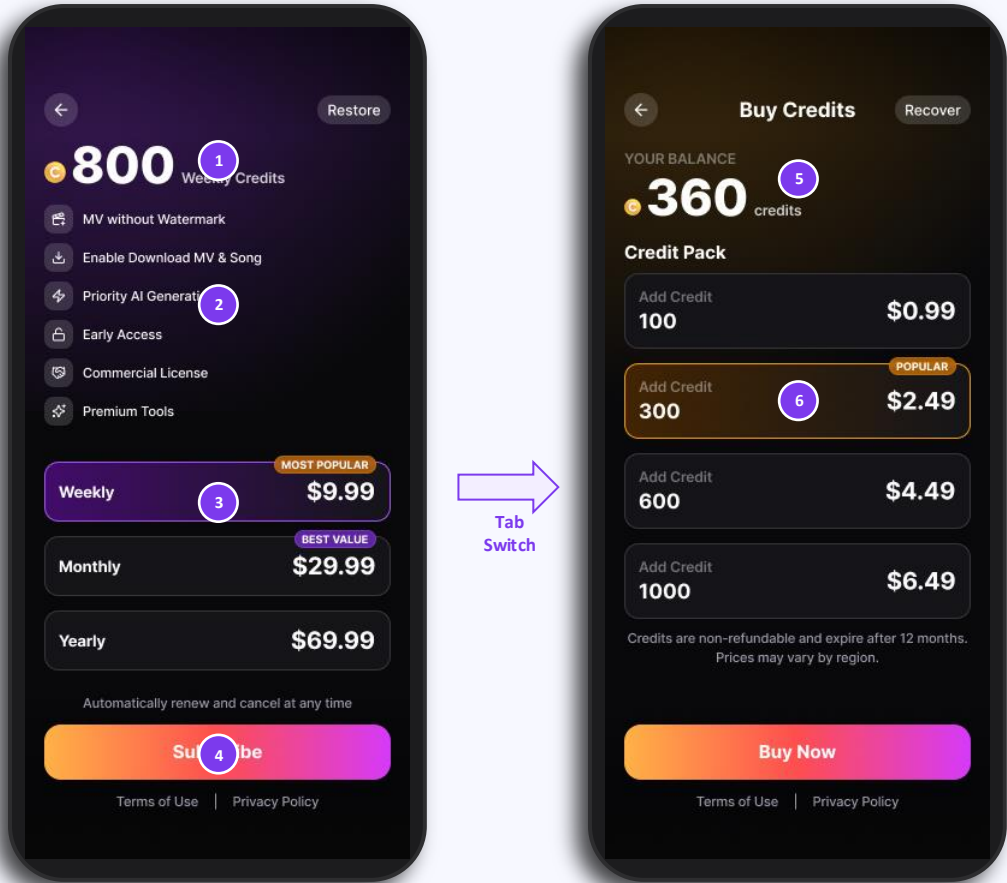

CALLOUT ANNOTATIONS

- 1 Credits Header — '800 Weekly Credits' with crown icon. Shows weekly value above plan selector cards.
- 2 Feature List — 6 Pro benefits: No Watermark · HD Download · Priority Queue · Early Access · Commercial Use · Premium Songs.
- 3 Plan Selector — Weekly (MOST POPULAR) · Monthly (BEST VALUE) · Yearly pill cards. Selected: purple border.
- 4 Subscribe CTA — 'Subscribe' purple button. Triggers App Store / Play Store native IAP purchase sheet.
- 5 Credit Balance — Account balance shown at top. Tap → Credits Detail screen (spend history).
- 6 Credit Packs — 100 / 300 / 600 / 1000 credit packs. 300 has POPULAR amber badge. Buy Now → IAP.

BEHAVIOUR & RULES

Subscribe plans	Auto-renew. Cancel via Settings → Unsubscribe; effective from next billing cycle.
Restore	'Restore Purchases' top-right restores Pro on new device or after re-install.
Credit expiry	Purchased credits never expire. Subscription credits reset each billing cycle.
Entry points	Subscribe: Account → Muse Pro Upgrade; paywall prompts. Credits: Account → Credits → Buy More.

Proof of Creation

Social

Monetization

OVERVIEW

Proof of Creation issues a ownership certificate for AI-generated songs. Includes song title, owner name, creation timestamp, and SHA-256 audio hash. v3.0 updates the certificate layout with a YouCam Muse watermark and adds a Proof Example preview button. Cost: \$4.90 one-time per song.

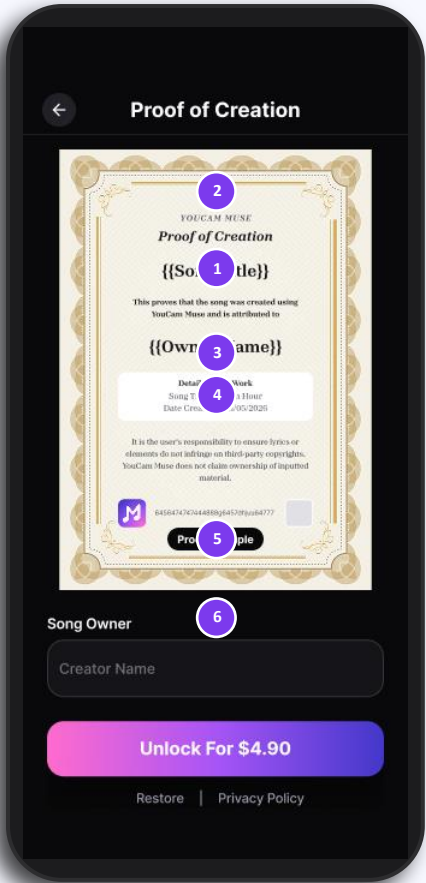

CALLOUT ANNOTATIONS

- 1
- Certificate — Paper-styled card with YouCam Muse logo, song title, owner name, and creation date.
- 2
- Song Title — Pulled from Song Result name. Cannot be changed after certificate is issued.
- 3
- Blockchain Hash — SHA-256 fingerprint of audio waveform. Used to verify certificate authenticity.
- 4
- Proof Example — 'View Sample' — opens a completed certificate example in a modal overlay.
- 5
- Owner Name — Text input for creator's legal name. Included in certificate PDF and NFT metadata.
- 6
- Unlock CTA — 'Unlock For \$4.90' — one-time IAP. Certificate PDF generated and emailed within 5s.

BEHAVIOUR & RULES

Issued once	Certificate is permanent; cannot be revoked or reissued. Re-downloading is always free.
Owner name	Must be a real name (no pseudonyms). Displayed publicly on the certificate.
Hash verification	Hash can be re-computed from any audio copy to confirm it matches the original.
Delivery	PDF sent to account email + saved to in-app Downloads. Viewable any time.
Edge case	Song deleted after cert issued: certificate remains valid and downloadable.

Overlays, Trim Audio & Sign In

OVERVIEW

Three contextual overlays. Face Selector appears when multiple faces are detected in an uploaded photo — user picks one face for the MV character. Sign In Sheet is the auth gate before any content creation.

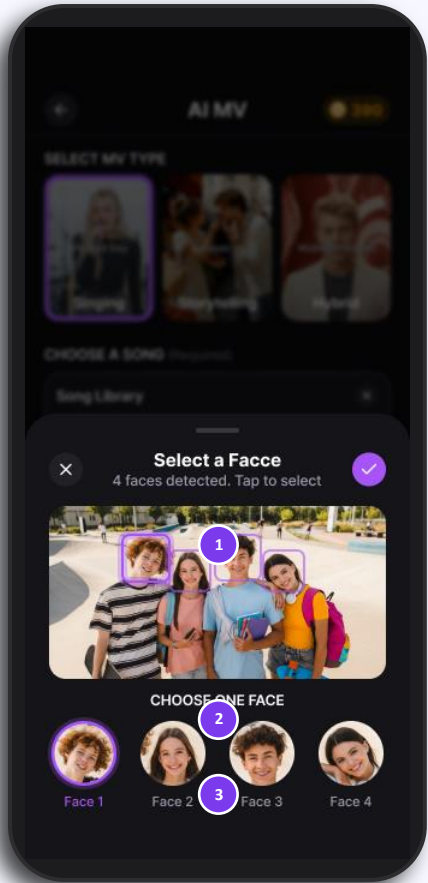

CALLOUT ANNOTATIONS

- 1 Detected Faces Photo — Uploaded group photo with AI bounding boxes drawn around each detected face (up to 6).
- 2 Face Selector Tiles — Row of circular face thumbnails. Tap to select; selected tile shows purple border.
- 3 Use This Face CTA — Bottom CTA enabled only after tapping a tile. Returns to Feature Room with face loaded.
- 4 Sign In Sheet — Bottom sheet with 'Sign In' title: Apple SSO · Google SSO · Email/Password options.
- 5 Auth Options — 'Continue with Apple' and 'Continue with Google' are primary CTAs. Email field below.
- 6 Trim Audio — Waveform timeline with start/end drag handles. 'Use This Clip' CTA at bottom.

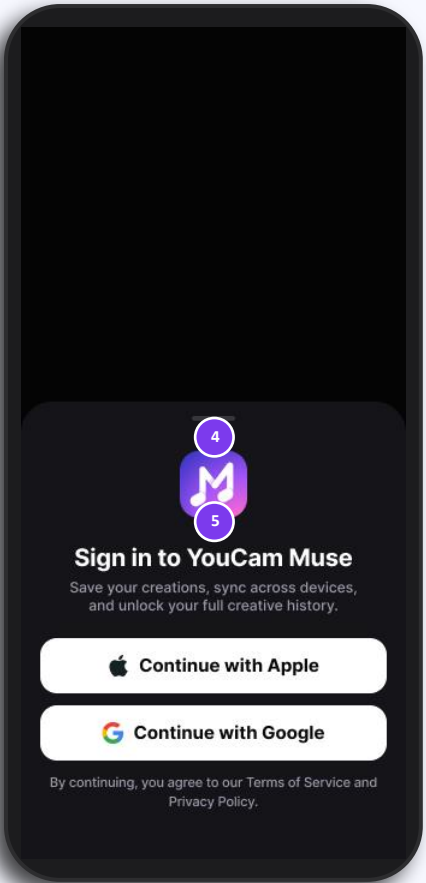

BEHAVIOUR & RULES

Face limit	Up to 6 faces detected. If more detected: top 6 by confidence score shown.
No faces	0 faces detected: toast 'No faces found — try a clearer photo'. Photo discarded.
Sign-in trigger	Tapping Create MV, Create Song, Like, or Proof of Creation triggers the auth gate.
Trim minimum	Selected clip must be ≥ MV duration. Handle cannot drag past minimum length.
Trim formats	MP3, AAC, WAV, M4A. Max 50 MB. Video file import rejected with error toast.
